

CURRICULUM VITAE

EDUCATION

Computer Engineering Iskenderun Technical University September 2020 - 2024

I have completed my undergraduate education at Iskenderun Technical University. Throughout my university education, I have focused on backend areas such as SQL, database management, Java, C#, C++, and C. I graduated with a solid foundation in computer engineering and a deep understanding of backend technologies. My education has equipped me with the necessary skills to tackle challenges in both hardware and software domains, and I am eager to apply my knowledge and expertise in practical environments.

Şehit Oğuz Özgür Çevik Anadolu High School September 2016 - June 2020

This school has helped me establish my engineering foundations through its numerically focused education. Additionally, through the guidance of its excellent instructors, I have come to understand the importance of having an advanced perspective and reading skills.

Fırat Işıldak

Junior computer engineer

Hello, I am Fırat IŞILDAK. I recently graduated from Iskenderun Technical University with a degree in computer engineering. Throughout my education, I have focused on backend development, gaining expertise in SQL, database management, Java, C#, C++, and C. During a summer internship at Sanal Soft, I honed my frontend skills, working with JavaScript, HTML, and CSS. This experience emphasized the importance of teamwork and effective communication, enhancing my ability to collaborate effectively. Additionally, I furthered my backend skills, particularly in PHP. I am proficient in various technologies including Java, C#, .Net, Entity Framework, SQL, HTML, CSS, Bootstrap, Git/Github, and PHP. Now, driven by my passion for continuous learning and self-improvement, I aspire to build a successful career in the field of technology.

EXPERIENCE

Sanal Soft

02/03/2023 - 17/08/2023

Since the education I received at school was mostly focused on backend, I felt lacking in the frontend area. Thanks to my internship, I improved my user interface skills by using JavaScript, HTML, and CSS. Additionally, I realized the importance of teamwork and effective communication in the software industry. As a result, my knowledge progressed not only in the software field but also in working techniques specific to the software branch. By enhancing qualities such as organization and dedication, I believe I am progressing towards becoming a more effective team player. Moreover, my accomplishments did not stop there; in the backend, I honed my skills in the efficient usage of an object-oriented language, PHP, in terms of productivity and optimization.

BURGER KING

summer 2022

I had the opportunity to work as a kitchen staff in this company. This experience improved my ability to solve problems quickly and strengthened my communication skills with people. I also gained the ability to work effectively as a team in a group setting.

SEÇ-AL

summer 2021

A small snack shop where I worked as a salesperson. This experience emphasized the importance of having a friendly demeanor when communicating with people. During my time here, I learned the impact that having a positive attitude can have on customer relationships.
